

ELEMENTE DE FIXARE

GHID DE SELECTIE:

| Tip gratar: [Ochi] x [Inaltime] | Tipuri de cleme |
|------------------------------------|-----------------|
| 38x38x26 | B26, S26, M26 |
| 19x19x30 | B1-30, S30 |
| 38x38x30 | B30, S30, M30 |
| 19x19x38 | B1-38, S38 |
| 38x38x38 | B38, S38, M38 |
| 50x50x50 | M50, S50, B50 |
| Gratar HLU: [Inaltime] | Tipuri de cleme |
| HLU 26+3 | B1-26, W26 |
| HLU 30+3 | B1-30, W30 |
| HLU 38+3 | B1-38, W38 |
| HLU 50+3 | B1-50, W50 |

TIPUL MATERIALELOR:

| Marcaj | Clasificare | Descriere |
|--------|-------------------------|--|
| GS | Otel galvanizat la cald | <p>Clemele sunt produse din otel galvanizat la cald. Pentru montare in medii cu risc scazut de expunere la coroziune ridicata. Otelul galvanizat are o durata de viata mai redusa atunci cand este expus regulat apelor pluviale sau marine.</p> |
| A2 | Otel inoxidabil tip A2 | <p>Clemele sunt produse din otel inoxidabil A2 (1.4301, AISI 304). Otelul inoxidabil A2 este cel mai utilizat tip de inox. Otelul inoxidabil austenitic A2 are o buna rezistenta la coroziune in conditii atmosferice normale, in medii umede, in oxidanti si acizi organici, in solutii alcaline, saline sau apa de mare. Acest tip de otel inoxidabil are un continut procentual de crom si nichel de 18/8 si este cel mai uzitat tip de inox.</p> |
| A4 | Otel inoxidabil tip A4 | <p>Clemele sunt produse din otel inoxidabil A4 (1.4401, AISI 316). Otelul inoxidabil A4 — al doilea cel mai uzitat tip de inox, este otelul cel mai rezistent la coroziune, cunoscut ca si "anti-acid". Este recunoscut pentru utilizarea in medii marine datorita rezistentei sale crescute la coroziunea datorata clorurilor, in comparatie cu tipul A2. Acest tip de otel prezinta o rezistenta mai buna in medii agresive cum ar fi apa de mare, cloruri, acizi etc.</p> |

ELEMENTE COMONENTE

Clema M pentru ochiuri
50x50

Clema M pentru ochiuri
38x38

Clema unghiuri
speciale

Clema disc (hilti)
pentru ochiuri 19x19

Clema disc pentru
ochiuri 38x38

Clema excentrica

Carlig cu surub

Clema tip U

B

Pentru gratare FRP cu dimensiunea ochiului de 38 x 38mm

Clema preseaza gratarul pe grinda de sustinere;
Fara gaurire:

Partea superioara: clema disc

Partea inferioara: clema excentrica

| Tipuri standard | Ochi x Inaltime | Set de prindere |
|-----------------|-----------------|-----------------------|
| B26 | 38x38x26 | Surub M8x50 + piulita |
| B30 | 38x38x30 | Surub M8x50 + piulita |
| B38 | 38x38x38 | Surub M8x60 + piulita |

B1

Pentru gratare FRP cu dimensiunea ochiului de 19 x 19mm si gratare HLU (acoperire 3 mm)

Clema preseaza gratarul pe grinda de sustinere;
Fara gaurire:

Partea superioara: clema disc ((hilti))

Partea inferioara: clema excentrica

| Tipuri standard | Ochi x Inaltime | Set de prindere |
|-----------------|-------------------|-----------------------|
| B1-26 | HLU26+3 | Surub M8x70 + piulita |
| B1-30 | 19x19x30, HLU30+3 | Surub M8x70 + piulita |
| B1-38 | 19x19x38, HLU38+3 | Surub M8x90 + piulita |
| B1-50 | HLU50+3 | Surub M8x90 + piulita |

M

Pentru gratare FRP cu dimensiunea ochiului de 38 x 38mm

Clema preseaza gratarul pe grinda de sustinere;
Grinda de sustinere trebuie gaurita;

Partea superioara: clema M
Partea inferioara: -

| Tipuri standard | Ochi x Inaltime | Set de prindere |
|-----------------|-----------------|-----------------------------|
| M26 | 38x38x26 | Surub M8x50, piulita, saiba |
| M30 | 38x38x30 | Surub M8x50, piulita, saiba |
| M38 | 38x38x38 | Surub M8x60, piulita, saiba |
| M50 | 50x50x50 | Surub M8x80, piulita, saiba |

Clema M este mai potrivita pentru fixare stabila, dar in zona de fixare se pot produce deteriorari in cazul unei flexiuni puternice. Clema S este mai prietenoasa cu gratarele FRP.

S

Pentru gratare FRP cu dimensiunea ochiului de 38 x 38mm si 19 x19mm

x19mm

Clema preseaza gratarul pe grinda de sustinere;
Grinda de sustinere trebuie gaurita;

Clema S este utilizabila pentru gratarele cu ochiuri de 19x19mm dupa decuparea unui ochi de 38x38mm

Partea superioara: clema disc / Partea inferioara: -

| Tipuri standard | Ochi x Inaltime | Set de prindere |
|-----------------|-------------------|-----------------------|
| S26 | 38x38x26,19x19x26 | Surub M8x50 + piulita |
| S30 | 38x38x30,19x19x30 | Surub M8x50 + piulita |
| S38 | 38x38x38,19x19x38 | Surub M8x60 + piulita |

W

Pentru gratare FRP HLU (acoperire 3mm)

Clema preseaza gratarul pe grinda de sustinere;
Grinda de sustinere trebuie gaurita;

Partea superioara: clema disc (hilti)
Partea inferioara: -

| Tipuri standard | Ochi x Inaltime | Set de prindere |
|-----------------|-----------------|-----------------------------|
| W26 | HLU26+3 | Surub M8x70, piulita, saiba |
| W30 | HLU30+3 | Surub M8x70, piulita, saiba |
| W38 | HLU38+3 | Surub M8x90, piulita, saiba |
| W50 | HLU50+3 | Surub M8x90, piulita, saiba |

F

Pentru gratare FRP cu dimensiunea ochiului de 38 x 38mm

Cleme pentru imbinarea gratarelor:

Partea superioara: clema disc (2buc)
Partea inferioara: clema tip U (1buc)

| Tipuri standard | Ochi x Inaltime | Set de prindere |
|-----------------|-----------------|-------------------------------|
| F26 | 38x38x26 | [Surub M8x50 + piulita] x2buc |
| F30 | 38x38x30 | [Surub M8x50 + piulita] x2buc |
| F38 | 38x38x38 | [Surub M8x50 + piulita] x2buc |
| F50 | 50x50x50 | [Surub M8x60 + piulita] x2buc |

**Set suport
trepte**

Set suport conceput special pentru trepte.

Partea superioara: clema M (4buc)

Partea inferioara: clema unghiuri speciale (2buc)

Set de prindere:

[Surub M8x50 + piulita + saiba] x 4buc

[Surub M12x35 + piulita+ saiba] x 4buc
